

Prerequisites for the Connection

After you have purchased the AI licence from DeDeNet, we establish the necessary connections between the AI and your backend.

AI Provider

You choose an AI provider (e.g. OpenAI, Anthropic, xAI or similar) and negotiate the terms for token consumption and whether automatic top-ups should occur up to a certain limit. Each question and each reply consumes one token respectively.

The AI provider issues you the corresponding API key.

Activating the Chat via the Backend

Basic configuration - Settings - AI: Chat

Enter the provider, the desired model and the API key at this point.
