KPI Widgets Order

There are 2 widgets available in the Orders type.

You can find KPI widgets in the "2 x 1 Widgets" type on the dashboard; further information on displaying them can be found here.

Orders current month

The basis for the count is the "Order date" field from the order header.

1. The number shows the quantity of orders in the current month.
   - Black, if the value is greater than 0
   - Red, if the value is equal to 0.
2. The blue chart shows the quantity of orders per month in the last 12 months. In this example screenshot, more orders were generated about 6 months ago than this month or 12 months ago.

Order status	**Included in count**
Uncompleted order	x
Completed, not transferred order	x
Completed, transferred order	x
Deleted order	

Order sum current month

The basis for calculating the monthly values is the "Order date" field from the order header.

1. The number shows the order sum of the current month without decimal places.
   - Black, if the value is greater than 0
   - Red, if the value is equal to 0.
2. The blue chart shows the values per month from the past 12 months. In this example screenshot, significantly more orders were written this month than in the past 12 months.

Order status	**Value included in calculation**
Uncompleted order	x
Completed, not transferred order	x
Completed, transferred order	x
Deleted order
