FAQ

Can I automatically reduce the size of the photos from the Photo documentation?

- Yes, for the client the photos can be set to a smaller size via Basic configuration - Settings - "Automatically reduce photos from Photo documentation".

Release

Photo detail page

Summary

The photo detail page is used to display and edit a single photo.

Only one photo is displayed on the photo detail page. The photo can be viewed in the normal view or in fullscreen. Additionally, the photo's metadata can be displayed.

Via the functions of the photo detail page, the photo can be shared or saved locally and – if possible – edited.

Functions in the title bar

Icon	Explanation
	Share
	Save to local file system

Header

1. Switches to the In progress mode

Photo display

A single photo is displayed on the photo detail page.

Initial display

The photo is shown in the initial display:

- displayed in the correct aspect ratio
- shown on a black background

- displayed centred

Full screen display

The single photo can be switched to fullscreen mode by clicking.

In fullscreen mode:

- the photo is displayed fullscreen
- all control elements are Hidden

A further click exits fullscreen mode and the photo is displayed again in the initial view.

Zoom

The display of the photo can be adjusted by zoom.

A double click switches between:

- Scale to fit: The photo is fully fitted into the available area
- Scale to zoom: The photo is displayed enlarged

On devices with touch control, the photo can also be zoomed in or out using pinch to zoom (two-finger gesture).

Data and metadata

The metadata of the currently displayed photo can be shown on the photo detail page.

The data relates exclusively to the photo displayed on the photo detail page.

PanelBar

The PanelBar with the photo data is only Visible if it is possible to edit at least one entry.

If no entry can be edited, the PanelBar is not displayed.

Editing a photo

The function in the header allows switching to In progress mode.

Whether editing is possible depends on the available editing options. The PanelBar with the photo data is only displayed if at least one entry can be edited.

Distinction from other image views

The photo detail page always shows a single photo.

It thus differs from the Presentation mode Photos in the Photos widget and from the Presentation mode Products in the Order entry:

- Photo detail page: a single photo with associated metadata.
- Presentation mode Photos: multiple photos can be selected and viewed via thumbnails.
- Presentation mode Products: multiple product pictures of a product can be viewed in the Order entry.

Presentation mode Photos

The presentation mode for photos is used to display photos in an enlarged view. In presentation mode, the currently selected photo is shown on a black background.

No photo data is displayed in presentation mode.

Presentation mode includes the areas of photo display, fullscreen display and photo selection (thumbs).

{{DDN-01@276#bkmrk-titel-icons}}

{{DDN-01@276#bkmrk-header}}

Initial display

When opening a photo in presentation mode, the photo is initially displayed in the initial view.

The initial view has the following characteristics:

- The photo is displayed in the correct aspect ratio.
- The photo is centred on a black background.
  Fullscreen

The photo can be displayed in fullscreen mode from presentation mode.

Fullscreen mode:

- The photo is displayed full screen
- All control elements are hidden

A further click ends the fullscreen display and the photo is shown again in the initial view of presentation mode.

Zoom

The display of the photo can be zoomed in or out.

A double-click switches between the views:

- Scale to fit: The photo is fully fitted into the available area
- Scale to zoom: The photo is displayed enlarged

Alternatively, the photo can be zoomed in or out using pinch to zoom, i.e. a two-finger gesture.

Photo data is not displayed in presentation mode.

Photo selection / Thumbs

Below the photo display is the list of available photos. This photo selection is called thumbs.

The thumbs have the following properties:

- The list of photos is horizontally scrollable.
- The photos are displayed square in the thumbs.
- In the square display, the photos are cropped depending on the respective source format. As a result, only parts of the original photo may be shown.
- The currently selected photo is positioned centrally.
- Due to the central positioning, only half photos may be visible to the left and right of the currently selected photo.
- If the currently selected photo is at the start of the list, no further photo is shown to the left.
- If the currently selected photo is at the end of the list, no further photo is shown to the right.

The thumbs thus serve to select the photo that is displayed in presentation mode.

Edit / Add an Entry

1. Photo Panel

Icon	Explanation
	Opens the file explorer to load a local picture into DeDeSales
	Opens the local camera of the respective device

2. Data Panel

The Data PanelBar is only visible if editing at least one entry is possible (Department, Campaign, Picture note 1-4, Picture check 1-4)
